

SARS-CoV-2 Testing

THE SAFE AND SIMPLE SOLUTION
AMID THE COVID-19 PANDEMIC

Key Benefits

- Extensively validated SARS-CoV-2 RT-PCR Test
- Quality assurance through participation in interlaboratory tests for SARS-CoV-2 detection (INSTAND e.V., EMQN, CAP)
- In accordance with strict Food and Drug Administration's Emergency Use Guidelines
- Results of standard analysis are available in the registration portal within 24-48 hours after sample receipt in 95%¹ of cases

Schematic Testing Procedure

1. Registration on the website www.centogene.com/corona

2. Throat swab is performed to collect a sample

3. Sample is analyzed² and the result report is provided through the online portal

User-Friendly Online Portal

- Seamless registration and result overview supported by a secure web-based platform
- Following GDPR/HIPPA conformity with the highest data protection standards

Your End-to-End Solution

- CentoSwab™ – Fully Validated Sample Collection Kit
- Secure IT Registration Portal
- High-Throughput Testing to detect SARS-CoV-2
- Forgery-Proof authentication via blockchain technology
