TRACE . TRACK . TRANSFORM .

Designed for
GAUCHER PATIENTS
to manage treatment and health

Monitor your condition

WHAT IS A BIOMARKER?

A biomarker is a measurable indicator of a biological state or condition. Biomarkers bring rationality to the treatment of patients with rare diseases and can be used as a measure of therapy efficacy and a guide for therapy dosage.

WHICH BIOMARKER PLAYS A ROLE IN GAUCHER DISEASE?

Lyso-Gb1 has been identified as the most effective biomarker for Gaucher disease and can be easily measured in blood.¹

WHY IS BIOMARKER LYSO-GB1 IMPORTANT?

Measuring biomarker Lyso-Gb1 is essential when being treated for Gaucher disease. Tracking Lyso-Gb1 levels aides in documenting your disease progression and the benefits of treatment. This data makes it possible to examine the efficacy of your therapy and, if necessary, to explore additional or alternative treatment methods.

myLSDapp PROVIDES YOU WITH BIOMARKER TESTING AND FULL TRANSPARENCY OF YOUR MEDICAL RESULTS.

Trace .

myLSDapp delivers the most up-to-date information from your biomarker levels directly to your device. This includes easy-to-understand visuals of disease progression and the effectiveness of treatment.

In addition, the app allows you to add your prescribed treatment course and set up reminders and timelines.

 **CENTOGENE**
BIOMARKER TESTING

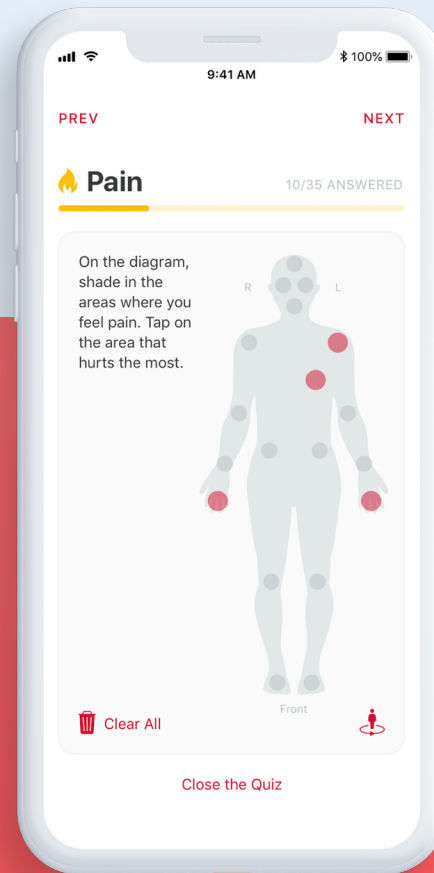

GET A CLEAR AND SIMPLE OVERVIEW
OF YOUR BIOMARKER RESULTS.

Track .

Understand the relationship between your biomarker levels and overall well-being by answering questions from quality of life quizzes.

The more information you track, the more insight your physician will have over your treatment.

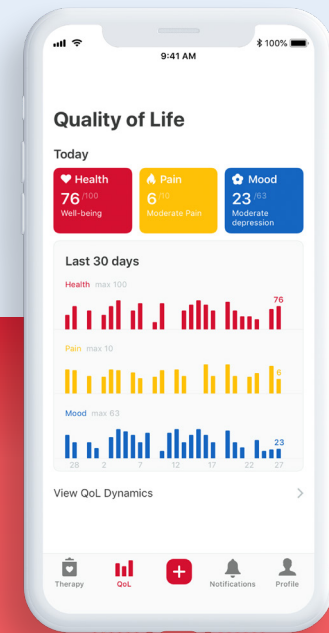

KEEP TRACK OF YOUR
QUALITY OF LIFE.

Transform .

Authorize your physician to follow your progress so that your scheduled visits become more effective.

All biomarker test results, along with your quality of life data, will be visible in myLSDapp to give you and your physician full transparency on all aspects of treatment and allow you to receive the best care possible.
